Search release handoff

The search update is ready for the on-call team. Maya owns the rollout until Jo confirms that the new index is serving traffic.

Owners and sign-off

Area	Owner	Ready when
Index	Jo	Search returns a match
Rollout	Maya	All replicas available
Support	Tess	Handoff acknowledged

Release checklist

1. Search for a known product and check the first result.
2. Confirm the deployment has finished rolling out.
3. Send the release summary to the support lead.

Check the deployment

```
kubectl rollout status deployment/search
```

Expected output ends with “successfully rolled out”. See the rollout status reference for details.
